# KINETICPAY MOBILE

Simple payment acceptance – right from a smartphone or tablet

## Expand your payment acceptance - anywhere your customers want to go.
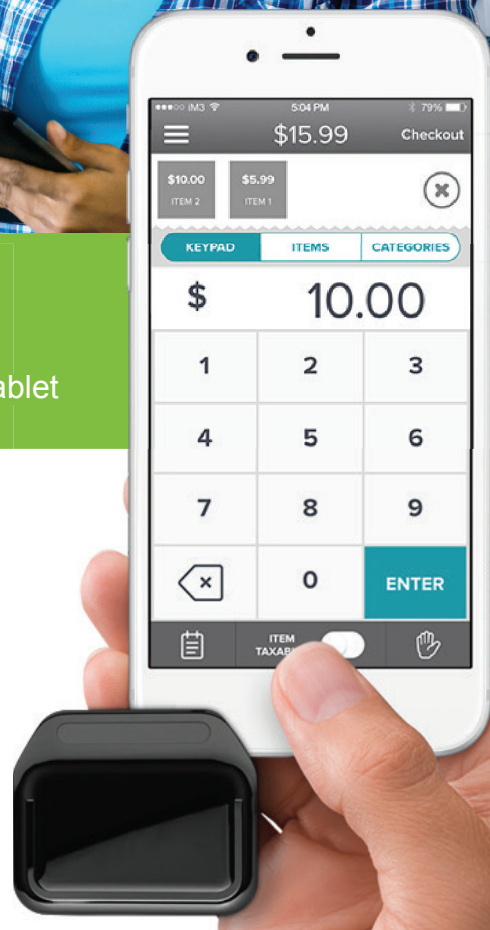

Quickly increase your payment acceptance options with Kineticpay(TM) Mobile while removing customer friction during the purchasing process.

Using the secure Kineticpay Mobile card reader, easily accept payments anywhere in your store, at the table, for line busting during peak hours or offsite during a customer delivery – simply from an iOS or Android™ smartphone or tablet.

Expand your payment acceptance – to anywhere your customers are.

- Decrease payment costs
- Increase customer reach
- Provide convenience and flexibility
- Secure, affordable and easy-to-use

Capture the convenience and flexibility of mobile payment acceptance – simply from your smart phone or tablet with Kineticpay Mobile.

Designed for small merchants, Kineticpay Mobile provides mobile payment convenience to expand your POS reach and greatly improve your bottom line.

Increase sales with **payments in motion**.

FIS

## Expand your payment acceptance – anywhere your customers want to go.

### Increase Customer Reach
- Easily accept credit, signature debit or gift cards while tracking cash sales.
- Pay at the table, in the aisle, or any remote location
- Simple line busting during peak periods

### Flexible Convenience
- Mobile card reader is a secure, sturdy bidirectional device that easily attaches to an iOS or Android smart phone or tablet via the audio jack.
- Simply download the Kineticpay application from the Apple® iTunes® and Google Play™ stores.
- Enter precalculated or custom tip at the time of signature.
- Email receipts, print receipts via Bluetooth or Wi-Fi connection and resend a receipt to a customer from the Transaction History.
- Manual item entry, custom tax rates, discounting and more.

### Inventory Management
- Easily store product names, images, descriptions, SKUs and taxable inclusions.
- Enter inventory locally.
- Group menu items by logical categories to ease selection or checkout.
- Add menu items and pricing.
- Group menu items by logical categories to ease check out.

### Gift Card Program Support
- Activate and load a new gift card.
- Reload value to existing cards.
- Perform balance inquiry to confirm the remaining balance on the card for customers.
- Customers can redeem value amounts from gift cards.
- Deactivate and replace cards; balances can be transferred to replacement cards.

**From your trusted partner in payments technology**

**Payments in Motion**

Add **Kineticpay POS**, a modern tablet-based POS for your brick and mortar locations and **Kineticpay Loyalty** for rewards and order and pay ahead functionality.
