

KINETICPAY POS

Sleek and secure tablet-based payment acceptance

Kineticpay™ POS – a sleek, full-featured yet cost-effective POS solution.

Kineticpay is a modern POS solution that provides tablet-based simplicity for in-store or in-restaurant payment acceptance. The sleek, all-in-one design provides an adjustable touch-screen display that easily flips for customer-facing signatures. An integrated barcode reader, cash drawer and receipt printer are also included to meet all your business needs and budget.

Using a connected terminal for EMV support, securely accept credit and signature debit. Every transaction is linked seamlessly through the Kineticpay Portal. Easily manage everything from payments to sales to product SKUs, all while recognizing consumer preferences and generating targeted rewards to increase engagement and loyalty.

- Reduce POS cost; affordable and easy-to-use
- Provides touch screen convenience and flexibility
- Impressive modern design
- Generate targeted rewards, increase customer loyalty and sales
- Support for EMV, Apple Pay, Samsung Pay, and Android Pay through a connected terminal

Capture the convenience, flexibility and touch of mobile technology with Kineticpay POS.

A point-of-sale solution for the customer-savvy merchant.

Designed for small to mid-sized merchants, Kineticpay POS delivers cost-effective convenience with an enhanced customer experience.
